

**MINOTTI**COLLEZIONI

## THE COMPANY

**MINOTTICOLLEZIONI** was founded in 1963 in the centre of the renowned area of Brianza. From the very beginning the company has specialized in this world-famous manufacturing area by producing classical style furniture.

Due to the passion for wood craftsmanship, the constant commitment to the pursuit of perfection and the ability to adapt its products according to each Customer's requirements, the company has been able to establish a solid international sales network.

All of the projects conceived by **MINOTTICOLLEZIONI** fully represent the potential of the collections concept by following the European and extra European market trends, where the company comes across the requests of several demanding countries.

As the years passed the Projects division has expanded and has developed its own particular features, leading the company to focus on the creation of new and fully customized items, along with the standard collections.

Nowadays the attention of the company management is aimed towards the creation of a proper business philosophy, referred to as The After Work Living Philosophy, which entirely involves the Customer by conveying a particular mood and a certain lifestyle signed by **MINOTTICOLLEZIONI**.

## THE AFTER WORK LIVING PHILOSOPHY AND THE NEW BRAND

That is how the Living Philosophy signed by **MINOTTICOLLEZIONI** comes to life in order to pursue the exploration of style, conceived as the soul of living emotions. This kind of Philosophy is thought to take pleasure in sensations across the products that have been designed to be experienced beyond the current trends.

The setting frame also features the sophisticated elegance of lines, the deceiving ambience atmosphere and the refined quality of the details.

A stylistic Design is conceived in order to enhance its value over time with a refined international taste for its products.

In order to reinforce the new Living Philosophy, the company **MINOTTICOLLEZIONI** has chosen to redesign its image by introducing the new Brand that embodies the distinguishing features of the company through the research of geometrical elements typical of the Architecture of the early '20s. The sinuous lines of elegant and essential forms reflect the new company profile.
